DOGGER BANK WIND FARM – Triaxys Wave and Current Monitoring Buoy Deployment

Mariners are advised of the deployment of a Triaxys Wave and Current Monitoring Buoy (see picture above). The buoy will be deployed by Gardline Environmental Ltd. Oceanography department, on behalf of Forewind Ltd. at the end of October/early November 2010 at 55°29.54' N 002°09.71'E (WGS84); the buoy is expected to be on site for a minimum of two years. Deployment operations will take place from the VSS Vigilant,. The buoy is 0.9m in diameter; it is bright yellow in colour and has a clear Perspex dome protecting an array of PV panels. It will transmit a light sequence as FI Y (5) 20s from an internal flasher beacon, and it will be moored on a single-point elasticated mooring with a scope of about 200m. Avoidance to a range of **500m** is requested.
